

KIT PUSH / PULL

At XAP Technology, we provide you our PUSH / PULL pallet kit, designed to fit all racing steering wheels to cars with sequential gearboxes.

Our PUSH / PULL pallet kit is easy to install, with a plug and play system that guarantees you optimum use of your sequential gears.

With its generous size and ergonomic design, this kit offers you an intuitive experience.

You'll be able to save precious seconds on the track thanks to a significant reduction in arm and hand movements.

Using your fingers to change gear will also help you to improve responsiveness, maximising your racing performance.

OUR ADVANTAGES :

- EASY TO INSTALL
- PLUG AND PLAY
- SIMPLE TO USE
- ERGONOMIC
- INCREASED REACTIVITY
- REDUCED MOVEMENT
- SAVES TIME ON THE TRACK
- INCREASED CONCENTRATION FOR THE RIDER

Speeds at your fingertips !

Why should you choose XAP Technology?

As designers of racing wheels, it's our job to think like engineers, but also like pilots, to understand how to save precious seconds.
how to save precious seconds.

Our job is to help you improve your on-track performance in every way, whether it's in terms of the vehicle's behaviour or the driver's feeling when cornering, braking or at the point of reacceleration.

This push-pull kit is integrated into the DNA of the racing wheels for which we are renowned.

The result is a significant reduction in movement, making the driver more responsive at all times.

Your satisfaction is our priority !

When you choose XAP, you also benefit from personalised support from a committed team, ready to offer you an uncompromising experience.

Put your trust in a partner who puts your challenges at the heart of its priorities.
