

RETROFIT KIT

NEW SOLUTIONS MADE BY XAP!

At XAP Technology, we offer an essential retrofit kit for your older combustion-engine vehicles, capable of matching the original power and torque specifications set by the manufacturer.

This solution is 100% designed, manufactured, assembled and maintained in our workshops in the south of France.

Our kit is designed to fit a wide range of vehicles, whether passenger cars or commercial vehicles.

Installation requires a few mechanical modifications, but allows you to extend the life of your vehicle whilst enjoying the benefits of electric mobility, namely reduced maintenance and fuel costs, whilst also benefiting from government grants and subsidies.

OUR STRENGTHS

SIMPLICITY AND ADAPTABILITY:

- A turnkey installation carried out in our workshop.
- Extensive compatibility: The kit can be modified to accommodate larger vehicles..

ENHANCED PERFORMANCE:

- A powerful and responsive motor, with instant torque at 0 rpm.
- Batteries optimised to provide a range tailored to users' needs.

TIME SAVINGS FOR YOUR BUSINESS:

- No need to stop at the petrol station for short journeys; the kit can be recharged at home.

ENVIRONMENTALLY FRIENDLY:

- Reduced CO2 emissions and noise.
- Components selected for their durability.

LONG-TERM SAVINGS:

- Reduced running and maintenance costs.
- Incentives and grants to encourage the switch for individuals and businesses.
- Electricity, cheaper than fossil fuels.

COMPLIANCE AND SAFETY:

- Reinforced battery packs for total safety.

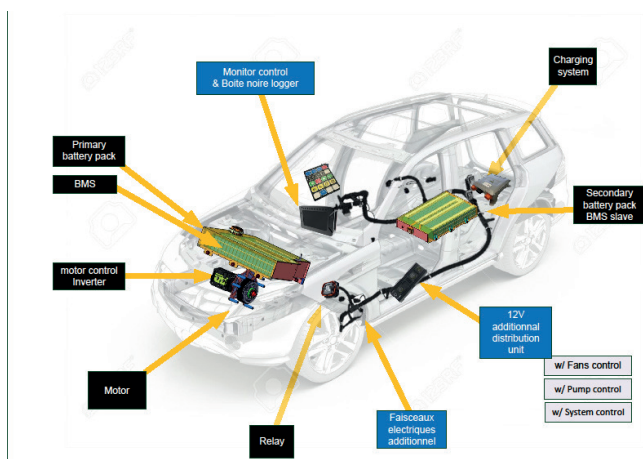

INNOVATIVE TECHNOLOGY:

- High-quality components, a high-performance battery management system (BMS) and regular software updates ensure maximum reliability and durability.

COMPREHENSIVE SUPPORT:

- XAP supports you every step of the way with technical assistance and training for professionals in the sector.
- You are never alone in your conversion project.

Competition is our laboratory! Our 4x4s retrofitted for the Rallye Aïcha Des Gazelles.

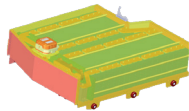

Retrofitting: how does it work?

We remove: the heat engine, the exhaust, the cooling, the depollution system and its recycling

We keep: chassis, gearbox, steering, transmission, braking system and braking system and its original wiring harness

We add:

- A fully customizable recording monitor
- Rear battery and cooling system
- Front battery and cooling
- 80 kWh electric motor
- RTCM power management
- 22KWh charger

Your satisfaction is our priority!

When you choose XAP, you also benefit from personalized support from a committed team, ready to offer you an uncompromising experience.

Put your trust in a partner who puts your challenges at the heart of its priorities.
