

1 Memtool setup

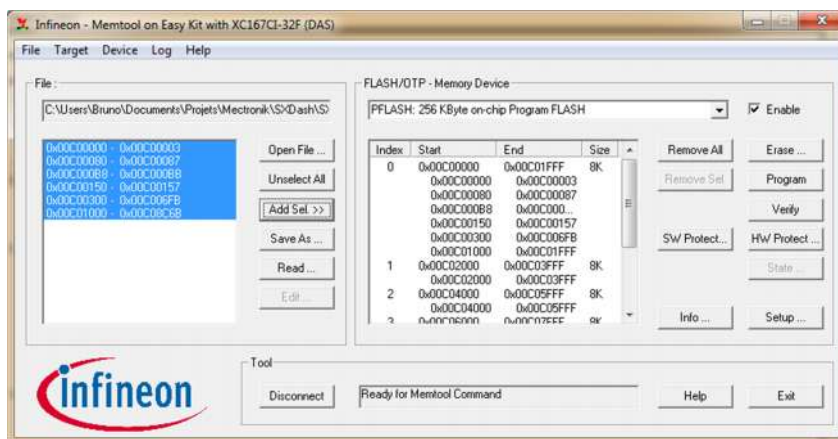

- Download Memtool : <http://www.xap.fr/download/imt-4-05-10.exe>
- Follow the setup procedure
- Copy the **Easykit_XC167CI-32F_das.cfg** file into **My Documents\Infineon\IMT 4.5\Targets** folder
- At program start, click on **Target\Change** and select this file.

2 Firmware upgrade with MemTool

- Connect the dashboard with the USB cable.
- Launch Memtool
- Click on Connect, it should say "Ready for Memtool Command"

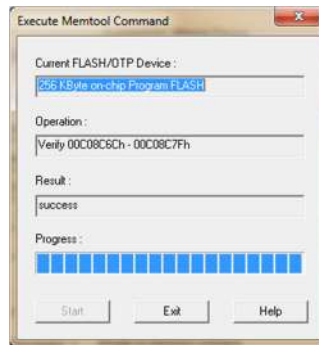

- Click on "Open File" and choose the h86 file provided.
- Click on Select All and then Add Sel. The content of the file should appear on the right.

- Click on Program. It won't work, so click on Cancel (or Exit if you're patient).

- Click on Disconnect and Connect. Then you click on Program again, and the software is programmed.

- Restart the dashboard.
